

## Species: *Cornus florida*

(kore'nus flor'i-dah)

### Flowering Dogwood

#### Cultivar Information

There are many cultivars and varieties of this species. Due to the extreme pest and disease issues associated with this plant, cultivar selection is of particular importance. Crosses with *C. kousa* have produced unique plants with disease resistance, see *C. kousa* for these cultivars.

\* See specific cultivar notes on next page.

#### Ornamental Characteristics

Size: Tree < 30 feet

Height: 20' - 30'

Leaves: Deciduous

Shape: rounded to flat-topped, with horizontal, spreading branches

Ornamental Other:

#### Environmental Characteristics

Light: Part shade

Hardy To Zone: 5b

Soil Ph: Requires acid (pH 5.0 to 7.0)

Environmental Other: Filtered shade is best

#### Insect Disease

susceptible to borer, petal and leaf spot, anthracnose; important to minimize stress and therefore susceptibility to disease

## Bare Root Transplanting

Any

## Other

transplant B &amp; B or from container, native to Northeast U.S.

Cultivars for *Cornus florida*Showing **1-11** of **11** items.
