

Species: *Hibiscus syriacus*

(hye-bis'cus si-ri-a'cus)

Rose-of -Sharon; Shrub Althaea

Cultivar Information

Many varieties of this species. Selection is based mainly around flower type, size, color, etc. Because seedling production can be a maintenance issue in some varieties, plants with low fruit/seed production are desirable.

* See specific cultivar notes on next page.

Ornamental Characteristics

Size: Shrub > 8 feet

Height: 8' - 12' (spread 6' - 10')

Leaves: Deciduous

Shape:

Ornamental Other: full sun or partial shade

Environmental Characteristics

Light: Full sun, Part shade

Hardy To Zone: 5b

Soil Ph: Can tolerate acid to alkaline soil (pH 5.0 to 8.0)

Environmental Other: flowers in late summer when few other woody plants are in bloom

Insect Disease

No diseases listed

Bare Root Transplanting

Any

Other

Native to China and India

Cultivars for *Hibiscus syriacus*

Showing **1-18** of **18** items.

Cultivar Name	Notes
Boule de Feu	'Boule de Feu' - large pin to red carnation like flowers
Minrosa	'Minrosa' - large single flower, pink with red center
