

Species: Quercus rubra

(kwer'kus rue'brah)

Red Oak; Northern Red Oak

Cultivar Information

* See specific cultivar notes on next page.

Crnamental Characteristics

Size: Tree > 30 feet
Height: 60' - 75' (equal spread)
Leaves: Deciduous
Shape: round habit in youth and maturity
Ornamental Other:

Environmental Characteristics

Light: Full sun Hardy To Zone: 3b Soil Ph: Can tolerate acid to neutral soil (pH 5.0 to 7.4) Salt Tolerance: Tolerates salty soil

Insect Disease

oak wilt is a serious problem in more southern areas; resistant to anthracnose; preferred by orangestriped oakworm

Bare Root Transplanting

Easy

Cither

native to North America (Nova Scotia to Pennsylvania, west to Minnesota and Iowa); transplant in spring; like *Q. palustris*, relatively easy to transplant

Cultivars for Quercus rubra

Showing **1-4** of **4** items.

| Cultivar Name | Notes |
|---------------|---|
| Aurea | 'Aurea' - young leaves emerge with a golden yellow color which matures to green; uncommon in the trade |
| Splendens | 'Splendens' - notably red fall color |
| Boltes Gold | 'Boltes Gold' - golden-yellow leaves in spring, darkening to lime green as they age; leaves turn shades of red and orange in autumn; leaves of this selection are less prone to burning than the more common Q. rubra 'Aurea'; grows to 50' tall x 32'wide |
| Magic Fire | 'Magic Fire' - yellow leaves in autumn; slow growing to 32 ft tall x 26' wide |
