

Species: *Vitis* spp.

(vye'tis)

Grape, Fox Grape, Wild Grape

Cultivar Information

This genus has many species and thousands of hybrids and cultivars. Selections have largely been made related to fruit yield, production, sugar-levels and pest and disease resistance.

Ornamental Characteristics

Size: Vine

Height: 30'

Leaves: Deciduous

Shape: climbing vine

Ornamental Other: shade tolerant

Environmental Characteristics

Light: Full sun, Part shade, Shade

Hardy To Zone: 4a

Soil Ph: Can tolerate acid to alkaline soil (pH 5.0 to 8.0)

Insect Disease

infrequent disease problems

Bare Root Transplanting

Any

Other

native; occasionally aggressive species usually found in the wild - *V. labrusca* (Fox Grape) and *V. riparia* (Frost Grape), native to E. North America
