

Species: *Crataegus phaenopyrum*

(kra-tee'gus fee-no-pye'rum)

Washington Hawthorn

Cultivar Information

* See specific cultivar notes on next page.

Ornamental Characteristics

Size: Tree < 30 feet

Height: 20' - 30'

Leaves: Deciduous

Shape: round

Ornamental Other: tolerant of a wide range of soils except poorly drained ones

Environmental Characteristics

Light: Full sun

Hardy To Zone: 4b

Soil Ph: Can tolerate acid to alkaline soil (pH 5.0 to 8.0)

Salt Tolerance: Tolerates salty soil

Environmental Other: white flowers; thorns; reddish-purple fall color; bright, glossy red persistent fruit

CU Structural Soil™: Yes

Insect Disease

resistant to cedar-hawthorn rust; less susceptible than other hawthorns to disease; susceptible to lacebug

Bare Root Transplanting

Difficult

Other

transplant in spring; somewhat slow to establish, native to Eastern and Midwest US

Cultivars for *Crataegus phaenopyrum*

Showing **1-3** of **3** items.
